Summary

Recent Computer Science graduate, seeking employment in the technology field. Experience with various programming languages such as Python, JavaScript, Java, CSS, HTML, Perl, and others. Experience as a Product Support Developer Intern, .NET developer intern, and various experience through classes and side projects.

Experience

Catalyst Repository Systems   2013
Product Support Developer Intern

Responsibilities included participating in weekly meetings, one-on-one project discussions, and development. Primary responsibility was converting existing Python scripts into WSGI applications and building customized scripts to fill requests from clients that were not available in the main product, but were still possible with the existing A.P.I.

ComplyTrax   2014
Web Developer Intern

Aided in the full stack development of the product. Using ASP.NET web views. Collaborated on the migration from ASP.NET web views to .NET MVC with C#. Created additional logic to use existing key-value store for database.

The TNB Group   2011 - Present
Freelance Web Developer

Contract based web development for clients of various businesses. Websites were developed using HTML, CSS, JavaScript, and the content management system Joomla or WordPress.

Skills

Programming Skills
Experience with Python, JavaScript, Perl, C#, MongoDB, Java, PHP, Bash, C++, HTML, CSS, Ruby, and MySQL.

Additional Technologies
Experience with Node.js, express.js, Mongoose, Django, Flask, Jekyll, Git, SSH, SSL, Stripe, GitHub, Socket.io, Linux, OSX, and Windows.

Education

Union College   2011 – 2015
Bachelor of Science - Computing
Computer Science emphasis
